

### “Instant-Remote-Workplace”- on demand

- Microsoft 365 E5
  - Windows 10 – Windows Virtual Desktop
  - Advanced Productivity
  - Advanced Security
- Azure Infrastructure as a Service
- Azure Networking (Site-to-Site VPN)

### Benefits

- Secure and immediate data access
- Working from everywhere
- Business continuity
- State of the art workplace
- Cost on demand

Windows 10 - Windows Virtual Desktop (WVD) is a VDI solution based on the Microsoft Azure Cloud. Combined with a Site-to-Site VPN tunnel the customer applications can still access backend systems in customers local data center.

Office 365 desktop apps still accessing the Microsoft cloud either via local installations or installations within the WVD client. This ensures safe and reliable access to customers business environment.

All employees accessing the customers applications and desktops from any place in the world. Even their home offices. While local

### At-a-glance:

**Customer:** FUCHS PETROLUB SE

**Website:** fuchs.com

**Customer Size:** 62 locations, 6000 employees

**Country:** Germany, globally operating

**Industry:** Lubricants Manufacturer

**Products and Services:** Microsoft 365 E3

Being hit by such an unexpected event like a pandemic outbreak of a virus which results in completely locked down countries affects every business. In those difficult times one of the key business is the lubrication of machines to keep them running. Without – no transportation, no food, no medical supplies and no goods.

To ensure that the world is still in movement lubrication is needed everywhere. Due to the crisis FUCHS had to send home their employees and stopping their business. With help of **GAB ExactlyIT Solutions GmbH** the manufacturer **FUCHS** could continue their critical business and we ensured that the world still goes around.

## Customer challenges

When the Corona crisis started to expand the customer was faced with the challenge that his globally operating workforce could not use the offices anymore but needed to stay operational to continue their business. This is also very important to ensure the world supply for food and medical equipment during the crisis. Especially the workforce in Germany was affected. Therefore the customer needed a very quick solution to re-enable their workforce.

## GAB ExactlyIT Solution

An Azure cloud-based Windows 10 - Windows Virtual Desktop (WVD) environment was immediately build and a dedicated site to site VPN tunnel between the cloud and the local datacenter granting access to local resources and application server. The Microsoft 365 E3 features were used to secure identities in state of the art for the affected workforce all around the globe. The whole solution was operational in one-week timeframe. Now all employees were able to access their critical data and deliver their customers important lubricants.

## Customer Benefits

**Business continuity based on secure and immediate access to data from everywhere**

By engaging with the GAB ExactlyIT Solutions GmbH we ensured the worlds supply for food and medical equipment. And the customer could **reduce down-time** of his employees and **stopped** his **revenue loss significantly**.

By using the **"Anywhere-Anytime-Anydevice"** - concept we ensure the **secured access** to all needed **data sources** and **applications** while maintaining **security & compliance** standards.

**No additional investment** for **physical servers** in your local datacenter. The customer **pays** only for virtual desktops **when used** → **reducing** operational **IT costs!**
